

## Press Release

### ***Jayshree Chemicals appoints Uhde India for Caustic Soda Conversion project at Orissa....***

Uhde India has been awarded a contract by Jayshree Chemicals Limited for conversion of their existing mercury cells Caustic Soda plant at Ganjam in Orissa. The scope of the contract involves Knowhow, Basic and Detailed Engineering, Project Management Services, Supply of Membrane Cell elements, Procurement / Inspection / Expediting Services, Site Supervision Services, and Supervision services for Cell Assembly, Start-up, Commissioning and Performance Test Run.

The plant will use the latest 5B Membrane Cells of Uhde, whose proven Caustic Soda technology is widely sought after for its energy / cost savings and environmental considerations. Mechanical Completion is to be achieved in a period of 18 months. When commissioned, the plant will have a capacity of 152 tpd.

Jayshree Chemicals is primarily engaged in manufacture of Caustic Soda – Chlorine and distribution of caustic soda, chlorine and hydrochloric acid. Uhde India is amongst the leading engineering consulting companies in India, with a market share of approximately 70% of the membrane cell business in India.

Mr.D.K.Maheshwari, Executive Director, Jayashree Chemicals and Mr.P.D.Samudra, Executive Director – Sales, Uhde India exchange contract copies at the signing ceremony of the Membrane Cell project in the presence of Mr.V.Bangur, Director and officials of Jayshree Chemicals and Uhde India
