Uhde Group at Achema 2009

The Uhde Group participated in Achema 2009 held in Frankfurt, Germany in May 2009, showcasing its abilities and credentials in a futuristic-looking stall with a campaign entitled 'The Power of New'. The international 'Engineering with ideas' engineering and plant implementation company, based its campaign on the 'new' which is born of ideas - ideas for new plants and processes which help our customers around the world to use raw materials and energy sources more efficiently than before.

The Uhde stall, which was represented by teams from the various Uhde companies across the globe, received a good response from clients and business associates.

Generally, Achema 2009 concluded on an upbeat note with indications that a transition in global trends would be witnessed in the near future. A larger contingent of international visitors was also recorded in this edition of the trade fair. The fair also featured an India Day Seminar, which featured Dr. Michael Thiemann, Chairman of the Uhde Group and Managing Director of Uhde India on the panel.
