

Uhde India Private Limited, Uhde House, LBS Marg, Vikhroli (W), Mumbai 400 083, India

**Uhde India cooperates exclusively with Uhde Inventa-Fischer for MTR and Polyamide projects....**

Uhde Inventa-Fischer offers the latest proven technology based on the unique 2-stage technology for the polyamide-6 polymerization up to capacities of 250 mt/day. The 1- stage technology is also available on request. Uhde Inventa-Fischer's cost effective and ecological recycling concepts, direct re-feeding, over-proportional re-feeding and re-polymerization processes guarantee the market's lowest caprolactam consumption. Uhde Inventa-Fischer also offers technology for polyamide-6.6 and speciality polyamides.

The MTR® process is based on Uhde Inventa-Fischer's proprietary 2-Reactor high i.V. melt technology. Reduced thermal stress and soft reaction conditions, combined with maximum raw material yield and low investment, highly improve your profitability – 30% less conversion cost is feasible. PET resin technology developed by Uhde Inventa-Fischer is ideal for all your packaging needs.
