The Andhra Sugars Limited (ASL) reaffirms trust in Uhde India Membrane Cell Technology with Conversion Order.....

The Andhra Sugars Limited has entrusted Uhde India with converting their existing DeNora Cells at their Caustic Soda facilities in Saggonda, Andhra Pradesh with Uhde Membrane Cells.

Uhde India will convert ASL's 100 tpd DeNora Cells with the latest Generation 5B Membrane Cells to produce 136 tpd of Caustic Soda. The scope of services includes Basic and Detailed Engineering, Project Management Services, Supply of Cell Elements, and Supervision Services during Construction, Start-up, Commissioning and Performance Test Run.

The project is to be implemented in a time frame of 15 months from the Effective Date of Contract.

On completion of this assignment, ASL's facilities will have a total capacity of 436 tpd Caustic Soda, entirely from Uhde Membrane Cells. Uhde India's association with the Caustic Soda major began in 2001, and was followed by a number of expansion orders.

Dr.Mullapudi Harishchandra Prasad, Chairman & MD and Mr. Narendranath Chowdary, Jt. Managing Director of The Andhra Sugars Limited, along with other ASL officials with Uhde India's team after signing the contract
