Uhde India successfully commissions Polyaluminium Chloride plant for Andhra Sugars...

Uhde India has successfully commissioned a 28,700 TPA Polyaluminium Chloride plant for The Andhra Sugars Limited at their Saggonda Chemicals Complex in Andhra Pradesh. The plant is satisfactorily producing the 18% PAC grade with the required purity.

Uhde India's scope of services included Detailed Engineering, Site Supervision activities and Supervision services during Commissioning. Contec SRL provided the technology for the project.

Uhde India has successfully implemented projects for Polyaluminium Chloride in recent years. It has been associated with The Andhra Sugars Limited, amongst the leading major, multi-product Industrial Houses in A.P. for their Caustic Soda and Caustic Potash facilities since 2001 at their Kovvur and Saggonda facilities .
