## **KAFCO appoints Uhde India for Urea Granulation Revamp project....**

The Karnphuli Fertilizer Company Limited (KAFCO) has recently awarded Uhde India a contract to render Detailed Engineering and Site Supervision Services for the expansion of its Urea Granulation plant in Chittagong in Bangladesh.

The project entails raising the capacity of their Urea Granulation plant to 2,100 tpd with an additional 10% for recovery after granulation washing. The technology for the project will be provided by Uhde Fertilizer Technology, an Uhde Group company based in Germany.

KAFCO is a 100% export-oriented international joint venture company, established in Bangladesh with the support and shareholding of the Government of Bangladesh, KAFCO – Japan, Haldor Topsoe of Denmark and Stamicarbon of The Netherlands.

Uhde India has considerable experience in Urea and Urea Granulation plants having implemented projects in India and abroad.
